REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the present invention relates to a multi-bit memory device. The independent claim 21 recites a semiconductor memory device having a plurality of data storage circuit which are connected to a plurality of bit lines in a one-to-one correspondence, wherein the data storage circuit comprising a first latch and a second latch, and a write circuit, which writes the input data stored in one of the first latch circuit to the memory cells, and a write verify circuit which verifies the data of the memory cells, the data verified by the write verify circuit is stored in another latch circuit of the second latch circuit. The Tanaka et al (6,282,117) fails to disclose or suggest a plurality of data storage circuit which are connected to said plurality of bit lines in a one-to-one correspondence and a write verify circuit which verifies the data of the memory cells, the data verified by the write verify circuit is stored in another latch circuit of the second latch circuit. Therefore, claims 21-33 are in condition for allowance

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
